

Achieve real business value.

An industry-leading unified platform to help drive innovation at scale.

Supports All Process Types

Unified platform that supports the full spectrum of business process: straight-through-processing, long-running, ad hoc and case processes.

Mobile Enablement

Allows process design, optimization and execution virtually anywhere and at any time, using smartphones or tablets. Responsive design adapts to the device.

Performance & Scalability

Supports departmental and enterprise-wide projects. IBM BPM provides a robust, secure and scalable environment that grows as needed.

Extend Existing Investments

Use IBM BPM to enhance your existing Salesforce.com, SAP or Maximo solution. Extend automation and visibility to the back office for seamless communication.

Iterate Quickly

Process playbacks supports an iterative implementation approach and maintains a shared understanding between business and development teams.

Program-Wide Governance

Organizes, manages, monitors and deploys process artifacts, applications and services from the business process management program.

Real-Time Collaboration

Collaboration for facilitating task management and communications with subject matter experts, helping to ensure project accuracy and timely completion.

Available on Cloud

Full lifecycle environment including development, test and production—with tooling and run time for process design, execution, monitoring and optimization.
