

Process made simple.

Capture and improve business processes in the cloud.

Model Business Processes

Process discovery and modeling tool designed for business users. Capture process steps and document an extensive set of process details -- standard and custom attributes. Analyze, visualize and compare process metrics and details.

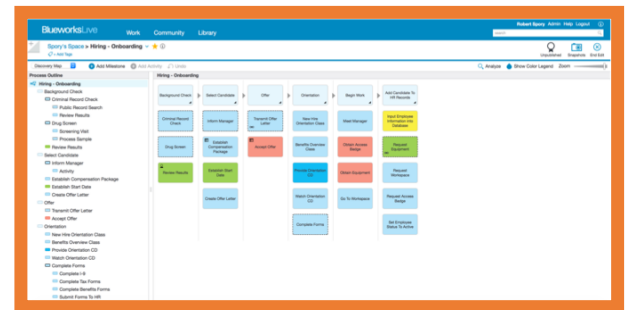

Intuitive & Easy-to-Use

Introduces process modeling in a simple and user-friendly way. Get started quickly with no training required. Add each step of your process, drag and drop the boxes to reorder the flow, and then automatically generate a process diagram.

Powerful Collaboration Tools

Work collaboratively and see changes dynamically. Post comments and share ideas. Keep teams in synch with a central repository for your organization's knowledge that is always accessible and up-to-date in the cloud.

Get rid of sticky notes, white boards, 'butcher' paper and generic drawing software. See what an easy-to-use process modeling tool can do to help transform your business.

How to get started?

Sign up for a free 30-day full-access trial of IBM Blueworks Live at blueworkslive.com and begin process discovery in minutes.

Afterwards, invite your colleagues to collaborate with you!
