

Meet your new virtual workforce.

Help reduce costs, minimize errors and free employees from repetitive back-office tasks with robotic process automation (RPA) .

Reduce Human Errors

Eliminate copy and paste mistakes or errors from manually entered data.

Business or IT Led

Requires understanding of only simple logical concepts. Quick learning curve.

Reduce Costs

Reduce costs by 50–70% for high-frequency repeated tasks.

Scale Quickly

IBM RPA customers scale quickly. Customers have deployed 2000+ bots.

What makes IBM RPA unique?

Simple Bot Creation

Create bots more quickly than other solutions by capturing the keystrokes and mouse-clicks you want the bot to replicate by using built-in screen recorders. You can create bots manually.

IBM BPM Express is Included

Orchestrate your digital workforce with business process management. IBM BPM Express provides a robust set of tools to author, test and deploy business processes.

Provides a Control Room

Within the Control Room, you can view tasks in progress, schedule bots, manage bot versions, administer users and roles, and maintain an audit trail of user and bot activities.

Extend Automation Products

RPA can be enhanced with other automation capabilities to provide more value. Make bots smarter with workflow, decision automation and data capture.
